

## WHAT YOU MISSED - RESUME WORKSHOP

On Thursday, August 10th, Kathy Roper conducted another great workshop for members interested in polishing their job search skill sets. Topics included how to develop a resume that includes accomplishment statements, the power of networking in uncovering opportunities, understanding the impact of our communications and gaining a grasp on the various types of questions that surface during interviews. All the members were provided with phone numbers and e-mail addresses and were encouraged to network with each other. Networking is a key component in the job search process. Thank you Kathy for taking the time to present another outstanding workshop.

This was brought to IFMA Atlanta by the Career Services Committee. Please contact Joe Carroll at 404-582-8859 if you are interested in joining this committee.

On July 28 the heads of two of our most prominent Facilities and Real Estate programs, Georgia State University's Real Estate program and Georgia Tech's Masters in Integrated Facility and Property Management were presented to the audience sitting in a new, state of the art classroom at Technology Square's Global Learning Center for the Corenet Global Atlanta Chapter education seminar. IFMA Atlanta members were invited and many IFMA attendees also learned about the value not only of the degrees, but also the research, intern and other scholarship opportunities with GSU and GT.

Dr. Julian Diaz from Georgia State and Dr. Roozbeh Kangari, Georgia Tech Masters Program.
